

Title: Unit 3: Floor Plans	Teacher:	Course:	Duration:
Content – What will students learn?			
Career/technical knowledge and skills		Academic knowledge and skills	
This unit describes basic floor plan design, and construction which is necessary information to those entering into architectural and construction fields.		Math skills: calculation of volume, use of geometry to enhance design flow, optional calculation of structural loads. Artistic skills are helpful for the creation of an attractive floor plan.	
Scenario			
Design a livable floorplan.
